etc. .and the latest developments in the field. The latest edition of the book, published by Springer-Verlag in 2018, is a valuable asset for the scientists and researchers. This book provides a vast amount of in-depth information about various areas of Biochemistry and Molecular Biology of Plants, such as structure of DNA, DNA replication, DNA methylation, DNA damage and repair. The book covers various fascinating areas of this science and, hence, it is a must-have for all who want to keep abreast with the recent advancements in the field. The book is a compilation of scientific reviews by eminent scientists from the whole world. The book includes contributions from Pakistan's renowned scientists and, therefore, it is a notable contribution to the scientific literature of the country. Some of the topics are: - Structure of the DNA - DNA replication - DNA methylation - DNA damage and repair - Interaction between DNA and proteins - Plant growth and development - Transcription factors - Gene

---

regulation and signal transduction - Plant hormone-like compounds - Cytoskeleton - Endoplasmic reticulum - Plant cell wall - Regulation of plant immunity - Carbohydrate metabolism - Secondary metabolite synthesis - Environmental stress response - Plant reproduction and development - Biosynthesis of quinine and quinone - Nucleic acid synthesis - Molecular plant growth and development - Plant proteome The book is a must-have for all who are interested in molecular biology, biochemistry and cytology. This book will benefit students, faculty members, scientists and researchers working in the field of plant sciences. Jyoti Gupta {#Sec1} ===== Associate Professor, Department of Botany, Banaras Hindu University, Varanasi, India Email: gptju@yahoo.com SECTION 1: EMC2 MR: Appears on EMC2 sensors when the air volume in the EMC2 is insufficient to drive the magnetostrictive portion of the sensor. It can be used to check the internal tuning conditions of an EMC2 sensor 82157476af
